

## *Introductions. . .*

I am YOU. My family and I live among you. We grocery shop among you. Our kids might play in the same sports and compete against each other. I vote with you, pay mortgage, property and income taxes just like you. I have to pay that darn late fee when I forget my tabs are due! I am your neighbor and want to be your friend. I want you to know that right up front. Seek me out at events and find out if it is true. I REALLY look forward to meeting as many 3rd districters as I can. We are all in this marxist whirlwind together - your family and mine - and trust needs to be rebuilt at our level...the level of neighbors and friends.

Graduating from the University of Minnesota with a Bachelor of Science degree in Aerospace Engineering I have, for the past 15 years, worked as a design engineer at various aerospace and mechanical businesses.

Annie is my wife, and together we have five children. Laura Beth (19), Samantha (17), Elizabeth (11), Laura Marie (9), and Joseph (born in Oct. 2008). We are Christians and attend Bethlehem Baptist Church.

After being blessed to sell our New Richmond house in November 2008, we were finally able to purchase the small 26-acre Houlton farm we eyed for two years. Developing the farm was our main goal. Annie loves her garden and brood of Buff Orpington chickens. I dream of the time, now put off by the campaign, when I am able to get my draft horses and work our field. The oldest two girls are busy with school and associated activities, and the younger two girls love taking care of their dogs and are eagerly saving for their own horses

## *Social & Economic Convictions. . .*

**Abortion** is the most vicious social evil of our time. From embryonic research through partial birth abortion, this practice must end.

**Marriage** is defined by the Lord in Genesis to be between one man and one woman. Period.

**Healthcare** The federal government has no authority to launch a medical takeover. There are things it should do to drastically reduce costs like tort reform, repealing coverage mandates and encouraging individual rather than employer policies.

**Stimulus/Bailouts/GM** were huge mistakes and government should not be in business of trying to control economic forces.

**2<sup>nd</sup> Amendment** Since 1934 the government has ignored the 2<sup>nd</sup> Amendment. All gun laws must be reversed.

**Foreign Affairs** When necessary to secure our security Congress must act to DECLARE WAR when needed as per the Constitution. No to nation building.

**Education** is best left to state or local authorities to manage and fund. Elimination of the NEA is one of my main legislative initiatives.

**Taxation** through a privacy infringing and overly complex income tax is socialism and counter to Liberty. Elimination of the IRS is one of my main legislative initiatives. The FairTax is much more compatible with our Constitutional Republic and I support it.

**States Rights** are those not enumerated in the US Constitution or those of individuals. We need to return to this idea and drastically offload the federal government of states responsibilities. Would you like to see your federal taxation reduced 90%? I would!

**War on Terror** mandates strong pre-emptive action in certain cases after a congressional declaration of war to unify the country and

congress. In all cases we must not engage in other countries disputes and wars unless our national security is in demonstrable and immediate danger.

**International Treaties** with intent to unify all countries under global governance and conform the US laws to those of other countries counter to the Constitution are wholly unacceptable and counter to the American interests. I will not support anything that undermines the US Constitution and in any way reduces our national sovereignty.

**United Nations** is the gathering place and nest of third world unethical and socialist governments attempting to reduce our standard of living. Membership in this organization and allowing the HQ on American soil is counter to American interests. Our involvement in the UN and its HQ must go.

**Federal Reserve** is a private organization taking on responsibilities of elected officials and must be dissolved.

**Illegal Immigration** is affecting our country in harmful ways. It must be stopped and illegals when found through any lawful means must be detained, their families gathered, and deported in the most efficient, yet humane way possible.

**Defense and Foreign Intelligence** should be the main budget item in the federal government. All other appropriations should pale in comparison. While I still subscribe to the two front war readiness mentality, I also advocate for large foreign intelligence and rapid response strike force units. Let's find and kill terrorist individuals and obliterate their camps before they get to US soil.

**Patriot Act/Know Your Customer** Ben Franklin once said, "A society that gives up a little liberty for a little security deserves neither and will lose both." I heartily agree. We are foolishly setting up the institutional framework for a tyrant to seize control. Laws like these must be eliminated.

# My Plans & Initiatives

## Constitution Unchained!

Constitution Unchained (CU) lays the foundation for the return of public focus to on Constitution. CU is composed of three elements.

### ELEMENT 1: Partnership

*Constituents and representative are an inseparable team*

**Be vocal**                      **Be active**  
**Be persevering**            **Be BOLD**  
**Be a constitutional candidate!!**

### ELEMENT 2: Authentic Representation

*The Representatives MAIN job!*

- I will read the bills before us or vote to reject
- I will only represent the views of my constituents
- I will personally read all letters and email! It's MY job to listen to my constituents.
- I will personally listen to all messages.
- I will personally reply to as many letters and emails as possible and seek to minimize form letters (I hate them!)
- I will conduct county tours and meetings whenever I am home for an extended period of time.
- I will write my own speeches. I assure you that what I say comes from me, not a hired speech writer.

### ELEMENT 3: Legislative Avalanche!

*Stop the pendulum...*

- Eliminate bill riders and unrelated amendments
- Simplify bill structure and prohibit inter-bill references
- Limit staff size for representatives to 2 or 3 at most

*Reverse the pendulum...*

- Sponsor at least 2 bills per month to slash federal gov size and influence
- Eliminate NEA, EPA, Depts. of Education and Energy, IRS, FEMA, ACORN, UN involvement, +++
- Work with states to shift control back to them

## Why I am running...

Like most of my neighbors I had life goals and ambitions. We just fulfilled a dream and bought property with acreage. We both wanted to concentrate on developing the farm while working full time jobs, saving for retirement and helping to put the kids through school. Starting our own product development company was also in the works. Those were our life goals.

November of 2008 brought about a shift in the federal government unlike anything we have experienced. Now, I don't know about you, neighbor, but I have not the stomach to look myself in the mirror and know I did NOTHING to protect my children from the likes of deceitful, power hungry, form letter writing punks that try to sell us Bills when they have not even read them themselves. They are MORE than happy to sell us those Bills to integrate us into government dependence and secure their role as provider. They don't bat an eye as they look into ours and lie, blatantly defy our Constitution and shirk their oath to defend it. This describes 95% of the people sitting in Congress and the Oval Office at the present time.

THIS is why I run for office:

- 1.) To destroy the idea that government is God
- 2.) To dethrone Ron Kind and break his Obama lock-step routine
- 3.) To lift up my district as an example that common people can rise up and displace oath-breaking, dishonest political hacks.
- 4.) For my children, and their children to live free and keep the fruits of their labor!
- 5.) To do my part to shift the balance of power away from Washington and back to the States.

If every conservative would fear not and vote for true idealistic constitutional conservatism we can together slash government down to size, jam it hard into the Constitutional box that was made for it and realize liberty beyond our wildest dreams!

## I Need Your help!

Our campaign desperately needs prayer, volunteers, donations and people willing to let me put a sign in your yard.

Paid for by Krsiean for Congress 1/2010
